Dear Valued Partner,

As we continue to navigate the course of Covid-19 and its impact around the world, our focus during this time is clear: minimize risk for our employees and our community while continuing to provide a high level of service to our customers.

We're proud to have exceptional engineering and production teams servicing customers throughout the world, but with that comes a responsibility to help protect the communities we serve. We are actively following CDC guidelines, promoting best practices within our workplace, and limiting physical contact between employees.

Even though most of our manufacturing and assembly is done in house, we do rely on a select number of outside sources, and while our supply lines remain solid, we have experienced some delivery delays on unique and specialized components. To date, we have had limited cases of Covid-19 within our primary location, which fortunately has had only minimal impact on our lead-times and deliveries. However, this is quite fluid and subject to change. We will do our best to maintain quoted lead times and delivery dates, and will keep you informed of any changes. As conditions that affect delivery may change unexpectedly, we are encouraging customers to order ahead whenever possible. Rest assured, we are doing everything we can to keep our business operational and minimize the impact to our customers.

We appreciate your understanding during this unprecedented time as we take precautions to protect the health and well-being of our employees and our communities.

Sincerely,

David Struyk
President
